cakap

Lesson 1

Best Education

Butterfly B2.2

Lesson Objectives

At the end of this lesson, students will be able to:

1. Identify and distinguish terms associated with education
2. Use ‘it’ + linking verb + adjective + that-clause to express opinions about the importance of education
3. Identify phrasal verbs connected to education
4. Discover one’s learning style
5. Conduct a discussion about education systems around the world
6. Apply ‘the more', 'less', 'worse ...’ to show cause and effects
7. Distinguish the words being asked using the details given and pronounce them correctly

Warm Up

Spend a minute listing down all of the different words you associate with the word “learning”.
Discuss with your teacher.

Vocabulary Build Up

Match the picture with the words.
What jobs can you get with the following courses?

criminology	engineering
management	accounting
nursing	psychology
tourism	education
medicine	Information technology

1 

2 

3 

4 

5 

6 

7 

8 

9 

10 

What other courses do you know?

Education

Unscramble the letters and explain how we can make them better.

1

L A O C O S M S R

_ _ _ _ _ _ _ _ _

2

H O N L Y T C O E G

_ _ _ _ _ _ _ _ _ _

3

S B J C T U E S

_ _ _ _ _ _ _ _

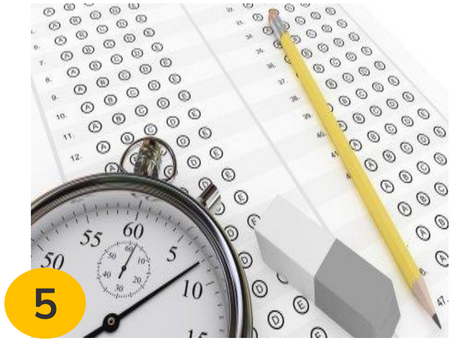

4

H C A T E R E S

_ _ _ _ _ _ _ _

5

N I A M N X T S E I A O

_ _ _ _ _ _ _ _ _ _ _ _

6

S S H U D L E E S C

_ _ _ _ _ _ _ _ _ _

Vocabulary Practice

Fill in the gaps. There is one word you don’t need to use.

analyze	system
global	statistics
essential	huge
quality	valuable
focus	exist

1. English is becoming a _____ language.
2. The store sells _____ furniture at reasonable prices.
3. One _____ that stuck out is that 40 percent of those surveyed did not have college degrees.
4. Renovating the house is a _____ undertaking.
5. A lot of _____ advice can be found in this book.
6. He's successful, but he feels that his life lacks_____.
7. A _____ microscope was use to analyze the bacteria.
8. As a fighter pilot, he knows that good vision is _____.
9. She believes that ghosts really do _____.

Fun Quiz

Do this fun quiz to find out what type of student you are. Do you agree with it?

https://www.funkidslive.com/quiz/quiz-what-type-of-student-are-you/

Reading Time!

Best Education (Part 1)

A new report into world education shows Finland has the best system. The global study is called "The Learning Curve" and is from the British magazine "The Economist". It aims to help governments provide a better education to students. The 52-page report looked at the education system in 50 countries. Researchers analyzed millions of statistics on exam grades, literacy rates, attendance, and university graduation rates. Asia did well in the report, with South Korea, Hong Kong, Japan and Singapore finishing second, third, fourth and fifth. The United States came 17th in the study, while Mexico, Brazil and Indonesia filled the bottom three positions in the top 50.

Reading Time!

Best Education (Part 2)

The Learning Curve reported on five things that education leaders should remember. The first is that spending lots of money on schools and teachers does not always mean students will learn. Second is that "good teachers are essential to high-quality education". The report said teachers should be "treated as the valuable professionals they are, not as technicians in a huge, educational machine". Numbers three and four are that a country's culture must have a strong focus on the importance of education, and parents have a key part to play. Finally, countries need to "educate for the future, not just the present." The report said: "Many of today's job titles...simply did not exist 20 years ago."

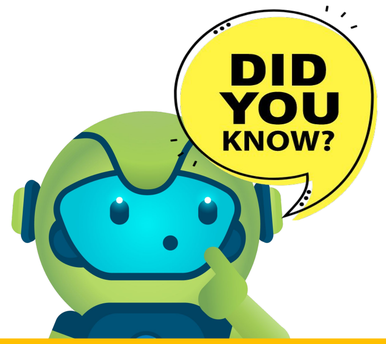

Reading Check Up

Answer the questions.

1. Which country has the best education system?
2. What is the report called?
3. How many countries were analyzed?
4. What are the factors researchers take into account to determine whether the education system is good or bad?
5. What are the five things that education leaders should remember?
6. What is the aim of the report?
7. Which countries filled the bottom three positions in top 50?
8. What does the report say about the treatment of teachers?

The students in China receive the most homework in the world. At an average, teenagers do a whopping 14 hours of homework in a week. Consider yourself lucky, you didn't have to!

1. What do you think about the education system in your country?
2. What would you like to change about the education system of your country?
3. Do you think expensive schools always offer great education?
4. What are the characteristics of a good teacher?
5. In your opinion, what is a good education?

Listening Activity

Listening 1.1

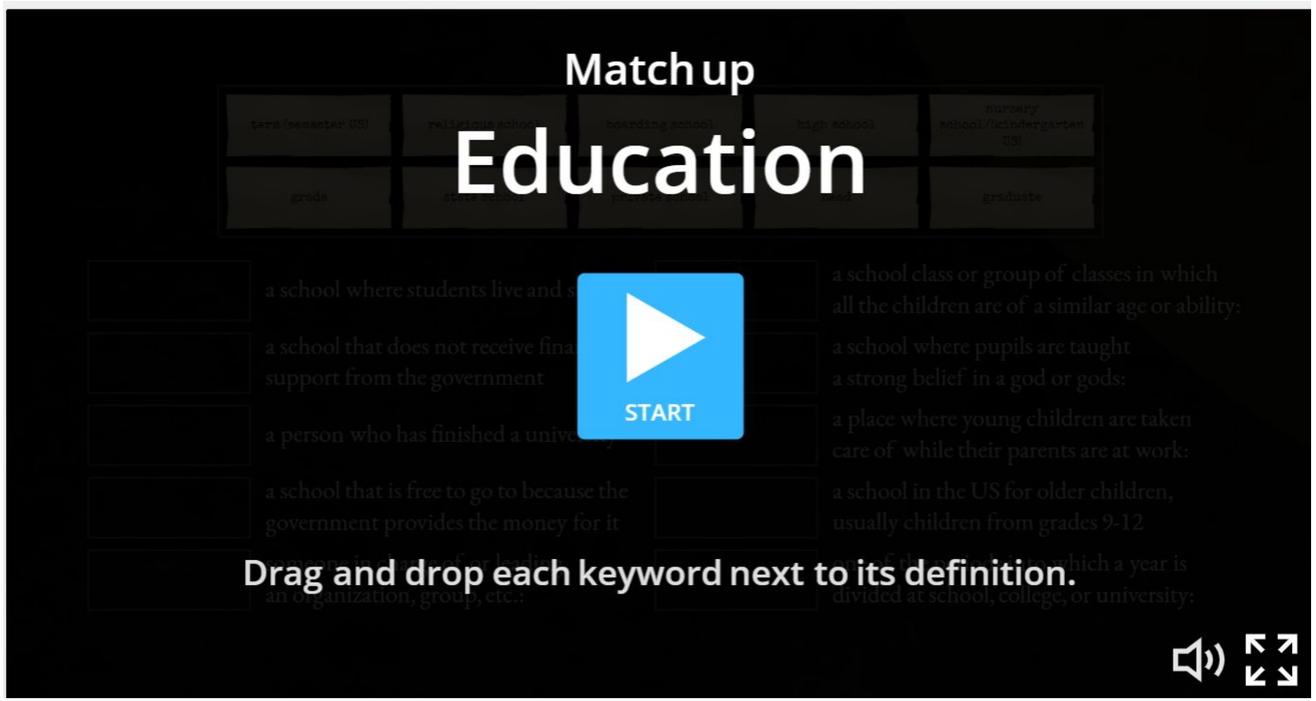

Listen about homeschooling. Choose true or false.

1. With homeschooling, children could avoid extremely long commutes.
2. One of the disadvantages of homeschooling is that children who don't attend conventional school might cannot learn social skills and make friends.
3. All of the parents of home-schooled children think they can do a better job themselves than a government or private school.
4. Most parents would surely struggle to give an education as complete as state/private schools.
5. At home, each subject is not taught by a qualified professional in that area.

About School

Open the link. Drag and drop each keyword next to its definition then click submit to check your answers. To know the correct answers, click on the 'show answer' and choose 'correct answer'.

https://wordwall.net/resource/547733/education

All Things Education

Work in pairs. What is the difference between these words/phrases?

1	an undergraduate	a graduate	a postgraduate
2	a subject	a module	a course
3	an essay	an assignment	a dissertation
4	a mark	continuous assessment	a progress report
5	a tutor	a lecturer	a professor
6	fees	a student loan	a scholarship

Choose six words/phrases that are connected to you or people you know. Then work in pairs. Tell each other why you chose those words. Ask follow-up questions.

Synonyms

Match column A and column B.

1. report
2. system
3. provide
4. analyze
5. literacy
6. essential
7. valuable
8. huge
9. key
10. titles

a. reading/ writing
b. necessary
c. method
d. important
e. examined
f. study
g. giant
h. give
i. names
j. precious

Vocabulary Practice

Complete the sentences using both words

1 | assignment | assessment |

Our teacher informed us that our _____ for the History course would be based on regular tests throughout the academic year and an _____.

2 | primary | seconadary |

Mary loves working with young children, so when she completed her _____ education, she trained to become a _____ school teacher.

3 | attend | go |

In most countries, pupils _____ to school for 12 years before they can ____ university.

4 | certificate | degree |

Harry earned a bachelor _____ in education, but he didn't enjoy teaching, so he quit and did a _____ in youth work; now he helps unemployed teenagers.

Vocabulary Practice

Complete the sentences using both words

5 | lesson | subject |

My favourite _____ at school is biology and in today's ____ we learnt about DNA and genetics.

6 | apprenticeship | scholarship |

My brothers are very different. John is academic and won a(n) _____ to the University of Oxford; Peter is very practical and is doing a(n) _____ in plumbing.

7 | fees | payments |

Some tuition _____ for private schools are very high and many parents struggle to make the ____ every term.

8 | licence | permit |

All residents with a valid driving _____ can apply for a parking _____ at the council offices.

Critical Thinking

Discuss the quotation below.

“CHANGE IS THE END RESULT OF ALL TRUE LEARNING.”

What do you think is the relation between making changes and learning? How does change help realize a better world for all individuals?

Language Focus

'It' + Linking Verb + Adjectives + Clause

We use ‘it’ + linking verb + adjective + that-clause to express opinions. Some adjectives commonly used in this way are sure, certain, necessary, right, important, clear, obvious, possible, impossible. We can omit that with no change in meaning.

Example

- It seems clear to me that swimming is good for the whole body.
- It is obvious that some people prefer reading books.
- It is possible that we can be educated by TV.
- It seems obvious that it is not necessary.
- It’s important (that) we look at the problem in more detail.

Some common linking verbs are:

- ✔ be (am, is, are, was, were)
- ✔ seem
- ✔ remain
- ✔ feel
- ✔ appear

Better Lives

Watch the video below. After watching, give your thoughts on the importance of education especially in the rural areas. Utilize 'it' + linking verb + adjective + that-clause when you express your opinion. Use the sample response as your pattern.

https://www.youtube.com/watch?v=-di1RHsX27U

The importance of learning a new language

*"**It is undeniable that** learning a foreign language and getting soaked into an entirely new culture and worldview is the surest way to become an open-minded, understanding, and tolerant individual. From this, **it is obvious that** seeing the world from a different perspective, and understanding where you and others come from, will forever be a fantastic, eye-opening experience."*

A School Prize

Imagine that a school is planning to offer a prize to a group of students who have worked very hard all year and got good results. Talk to each other about the advantages and disadvantages of giving prizes like this to students.

visit to a theme park

tickets to a (football match /concert)

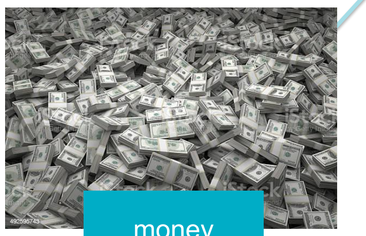

a special holiday

prizes for outstanding students

meal in a restaurant

money

trip to do an adventure sport

Now decide which prize would not be a good idea.

Phrasal Verb

Match the phrasal verbs to their meanings.

1.	breeze through		**a.** quit a course
2.	brush up		**b.** submit homework
3.	drop out		**c.** look at something, revise
4.	figure out		**d.** learn quickly
5.	go over		**e.** improve a skill quickly
6.	hand in		**f.** find something in a list
7.	look up		**g.** understand something
8.	pick up		**h.** pass easily, succeed

Now complete each sentence with two phrasal verbs from the first exercise.

1. Lisa is good at languages and managed to _____ French easily. However, that was many years ago and now she needs to _____ as she will be visiting Paris shortly.
2. Sam and Pam are twins, but they're very different. Sam is an excellent student and managed to _____ his university course. Pam, however, did badly and decided to _____ after her first year.
3. Before you _____ your homework to your teacher, it's a good idea to _____ it just to make sure there are really no silly mistakes.
4. If you're studying a language and can't _____ the meaning of a word, just _____ what it means in a dictionary.

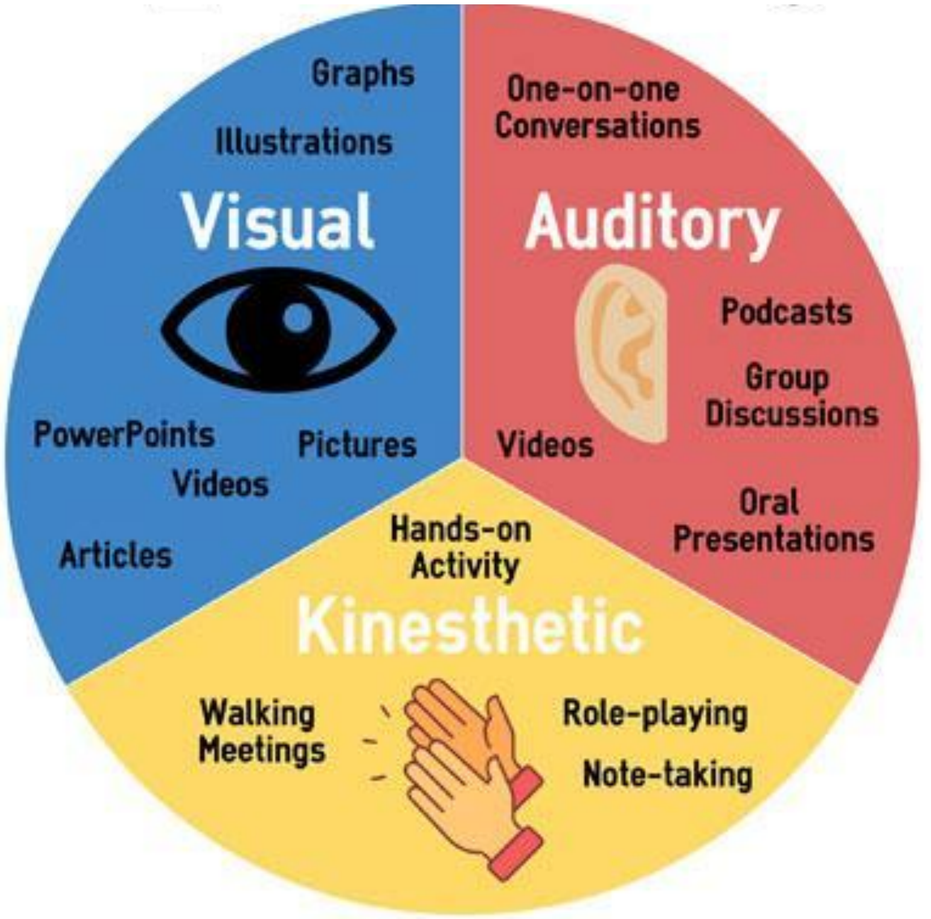

Learning Styles

Do you know your learning style? Do this quiz to find out what your learning style is. Then tell what you think. Do you think it's correct?

http://www.educationplanner.org/students/self-assessments/learning-styles-quiz.shtml

Education Systems

Find out the education systems of these countries. For example, how many hours they spend at school, if there is any national exam, etc. Which one is the best and the worst according to you?

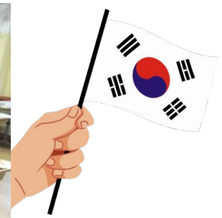

United Kingdom

Finland

South Korea

Indonesia

Language Focus

'The More ... The More ...'

comparative clauses ▶ use **the** in comparative phrases

'more', 'less', 'worse', 'better ... the more', 'less', 'worse ...'

to talk about one thing that is affected by another.

It begins with a comparative phrase such as **the better, the more, etc**. It is followed by the effect which also begins with a comparative phrase such as **the more, the worse, the better, the lesser.** The subject and predicate (verb) can be included to add specific information or omitted to express a general statement.

Example

- [talking about how watching TV is bad for you] I mean that you can watch one or two hours a day but ***the more*** you watch, ***the worse*** you become.
- ***The better*** education you have, ***the better*** opportunities you can get.
- ***The more*** the unemployment increases, ***the worse*** the violence becomes.

Language Practice

Change these sentences into comparative clauses using the more/less/better. Make changes if necessary. Give your thoughts.

You know more as you learn.

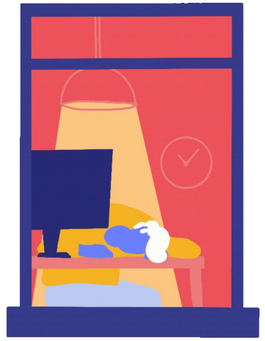

The more you learn, the more you know.

If you have better grades, you will also have better chances to enter top schools.

We become less enthusiastic to study when our parents force us to study more.

Wake up, Josh! If you postpone doing your homework more, imagine how pressured you will feel when the deadline finally approaches.

Reading

Testing… and Creativity (Part 1)

Have you ever stopped to consider how stressful school life is becoming because of tests and exams? Why on earth do we make kids do tests in their second year of primary school? This just encourages parents to pile on the pressure. I know seven year olds who have private tuition to help them pass their maths test! And the are parents who coach their three-year-olds so they can perform well in their interview for the ‘right nursery school’. How do you interview a-three-year-old? “I see from your CV, young Tom, you didn’t do very much in the first six month of your life. Why was that?!” I also know parents who don’t allow their children to go out near exams time. They expect them to stay in and study every night and they refuse to let them play sport, watch TV or listen to music.

Reading

Testing… and Creativity (Part 2)

No wonder kids resent having to do exams. I remember spending hours in exam rooms pouring out facts that I had squeezed into my brain the night before. That is what exams force us to do. It's an input-output model and there is generally only a right or a wrong answer. However, according to educationalist Ken Robinson, 'if you're not prepared to be wrong, you will never come up with anything original..... And we are running national education systems where mistakes are the worst thing you can make." he says we have to stop thinking this way. We are, after all, supposed to be educating children for the future, but we have no idea what today's kids will need to do in their working lives.

Reading

Testing… and Creativity (Part 3)

To prepare them, Robinson believes we should try to develop learning environments where they are encouraged to be creative and discover things for themselves. We should also remember to see them as individuals. Just because a child fails an exam doesn't mean they are a failure.

They might be a brilliant inventor or computer programmer, a wonderful singer or comedian. Still, most of us continue to believe we can only achieve success through passing more and more exams when there are so many who manage to succeed without them. Try googling the biographies of young entrepreneurs such as Adam Hildreth, who started a social networking site called Dubit Limited when he was fourteen and ended up being worth millions.

Reading

Testing… and Creativity (Part 4)

Obviously, he believed he could achieve his goals without passing the right exams. His motivation came from doing something he wanted to do, he enjoyed being creative.

Of course, no one wants to fly with a pilot or be treated by a doctor who hasn't proved their ability by passing exams. However, how many more Adam Hildreths are sitting in classrooms around the world just being tested and tested instead of being discovered? Surely education should encourage, not discourage creativity?

Reading Check Up

Read the article again. Tick the true sentences. Correct the false ones.

1. Children are tested at too young an age.
2. Parents should make their children study harder for exams.
3. There is no value in exams.
4. Our education system encourages original thinking.
5. Schools can't ever prepare students for the future.
6. Exams aren't the only way to evaluate ability.
7. Some talented children go unnoticed.

Vocabulary Spotlight

nursery school

a school for young children, mainly between the ages of three and five.

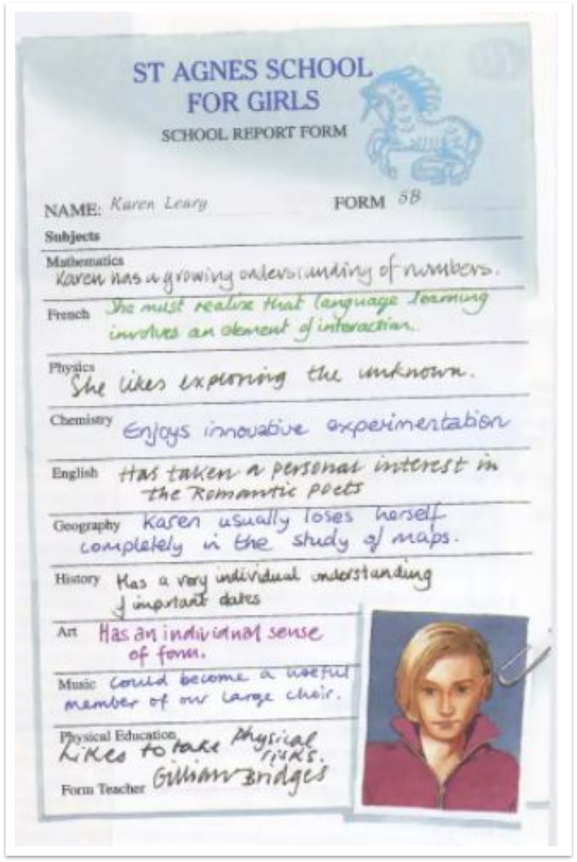

1. Do you agree with the arguments in the article? Why/why not?
2. Are exams important in your education system? Is it good?
3. How can exams help you learn?
4. Do you think your test scores reflect your true ability and intelligence?
5. If we omit exams, how can we say who is good/bad at schools?

School Report

ST AGNES SCHOOL
FOR GIRLS
SCHOOL REPORT FORM

NAME: Karen Leary FORM 5B

Subjects

Mathematics: Karen has a growing understanding of numbers.

French: She must realize that language learning involves an element of interaction.

Physics: She likes exploring the unknown.

Chemistry: Enjoys innovative experimentation

English: Has taken a personal interest in the Romantic poets

Geography: Karen usually loses herself completely in the study of maps.

History: Has a very individual understanding of important dates

Art: Has an individual sense of form.

Music: Could become a useful member of our large choir.

Physical Education: Likes to take Physical risks.

Form Teacher: Gillian Bridges

You can also read it here: Karen's School Report

Here's an old school report about a pupil's progress in different subjects. It was written in a very positive way that it sounds funny. An old school friend has interpreted the report in a much more realistic way. Read it and match the interpretations below with five of the subjects.

a. She never used to open her mouth.
b. She didn't use to be able to count from one to ten.
c. She used to like making bombs.
d. She used to send the boys love letters.
e. The teachers didn't use to know where she was most of the time.

- Make realistic interpretations about the other five subjects.
- Think about how good you were in different subjects in a school report. Write a positive report about yourself.
- Show it to your partner. Can he or she interpret it in a more realistic way?

Useful Expressions

Use the idioms in a sentence.

have one's nose in a book
to be keenly reading a book

flunk out
to fail a course, to fail and then leave school

pass with flying colors
to pass something easily and with a high score

Speaking Drill

1. Which subjects do you find easiest to pick up at school?
2. What subjects are you good at?
3. What subjects are you not good at?
4. What are the qualities of a good teacher?
5. Are you still friends with anyone that you went to school with?
6. Did you procrastinate studying? Did you ever pull an all nighter?
7. Do you think it is good for schools to insist on students wearing uniforms? Why?
8. What do you think of the idea of boys-only or girls-only schools?
9. Do you think education should be free? Why or why not?
10. Does school prepare you for day-to-day challenges? If not, what changes would you make to the school curriculum to do so?
11. Does school prepare you for your future life?
12. Is there a difference between school and education? What is the distinction?
13. What are the skills that separate good students from bad students?
14. Are good grades important to you?
15. Do teachers grade students fairly? Did you ever feel like you should have gotten a better grade than you did in a class?

Pronunciation Exercise

Identify the words being asked and pronounce them.

Silent L Words			
Word	**IPA**	**PoS**	**Definition**
	/wɔk/	verb	to move with the legs
	/kɑm/	adjective	not angry, upset, or excited
	/foʊks/	noun	people in general
	/hæf/	noun	one of two equal parts
	/tɔk/	verb	to express thoughts in words
	/ʧɑk/	noun	a soft rock used for writing

*IPA: International Phonetic Alphabet *PoS: Parts of Speech
